STORAGE MANUAL AT WORK

This is a finished product, no longer made any kind of final finish, applied layer of paint or cleaning done, therefore, to ensure the quality of the doors INTELLIGENT KIT and avoid possible damage to the product, unloading and storage of them must be made as instructed below:

- The product is delivered to the work place properly packaged, but still every care should be taken during unloading, loading one kit at a time so that there are no bumps and mashed.
- The kits can never be dragged, they must be lifted and moved with safe distance from the ground so they won't get dirty or wet.
- The kits should be stored in clean, dry, closed place, without any contact with water or moisture, or any material that could smudge them;
- Should be avoided the passage of persons with objects of any kind, near the kits so won't be no risk of knocks, kneaded etc..;
- Never place anything on the doors or side of them;
- The kits should be stacked vertically (as shown in picture 01). The kits should always be supported each other in order to come face to face on doors and crossbars with crossbars.
- The storage must always be made on pallets, so the kits do not come into contact with water or be in wet / damp environments.

No other form of storage will ensure the quality of this product.
